

PARTICIPANT INFORMED CONSENT FORM

Research Title	A multimodal dataset of touchscreen kinetics and inertial sensor logs during mindful and mindless smartphone scrolling
Principal Investigators	Leonard Wangka; Metta Kireina Tedjasurya
Affiliation	School of Computer Science, Bina Nusantara University

1. Purpose of the Research

You are invited to participate in a research study aimed at collecting human-computer interaction data. The goal is to build a dataset that captures touchscreen gestures and motion sensor patterns during different cognitive states of smartphone usage.

2. Description of the Procedure

If you agree to participate, the researchers will provide a dedicated research smartphone with a logging application pre-installed.

- You will be asked to perform social media (TikTok) activities using the provided research device instead of your own.
- The application will record technical logs: touchscreen coordinates, pressure, velocity, and inertial sensor data.
- No personal accounts or private information will be stored.

3. Data Sharing and Open Access

This study is conducted in accordance with Open Science principles. By signing this form, you acknowledge and agree that:

- The collected technical data will be fully anonymized.
- The anonymized dataset will be publicly shared in an open data repository for use by the global scientific community.

4. Privacy and Confidentiality

All information collected during this study will be treated with strict confidentiality. Your identity will never be disclosed in any publication or to the public. Only the anonymized technical logs from the research device will be published.

5. Voluntary Participation and Right to Withdraw

Your participation is entirely voluntary. You have the right to withdraw from the study at any time, for any reason, without any penalty. If you choose to withdraw, any data recorded during your session will be deleted upon request.

6. Ethics Compliance

This research is conducted in accordance with the ethical requirements for publication in Data in Brief and the principles of the Declaration of Helsinki.

CONSENT STATEMENT

I have read and understood the information provided above. I have had the opportunity to ask questions, and all my questions have been answered to my satisfaction. I voluntarily agree to participate in this study using the provided device and allow my anonymized data to be published in a public repository.
